BEGINNER

Make a program that reads 3 integer values and present the greatest one followed by the message "eh o maior". Use the following formula:

$$MaiorAB = \frac{(a+b+abs(a-b))}{2}$$

### Input

The input file contains 3 integer values.

### Output

Print the greatest of these three values followed by a space and the message "eh o maior".

Input Samples	Output Samples
7 14 106	106 eh o maior
217 14 6	217 eh o maior
